About us!

By Güçlü Vinc Our company, which started its operations in Istanbul in 2011, is taking firm steps towards branding with the service it has provided in European standards. We continue on our way with an active and efficient working system, without compromising on quality and without deviating from the principle of 100% customer satisfaction that we aim for production and manufacturing. As **By Güçlü Vinc**, its corporate structure is to continue our production by keeping the quality ahead of the price policy.

Our production area is the production of lifting groups, and we produce crane steel constructions with lifting groups of various capacities. Our minimum production capacity is 250 kg, and our maximum capacity is 300,000 kg. Our company, which aims to fulfill the demands of our customers completely and to provide the best and highest quality service in our works, primarily pays great attention to R&D studies.
